

Vision – Where we are headed?

Vision

"Be a leading, internationally accredited quality control organization providing quality testing services for food, drugs, and medical products to protect the health and wellbeing of consumers in Lao PDR ".

Mission: Why we exist

1. Test and analyze the quality of food, drug, health products, cosmetics, vaccines, narcotic and psychotropic drugs, toxic from food and pharmaceutical products;
2. Calibrate analytical instruments
3. Conduct scientific research on food and drug testing.

Bond

1. Research, upgrade knowledge, skills and research techniques to expand the scope of research capacity;
2. Develop the center's capacity to certify international standards ISO/IEC 17025:2017, WHOPQ and GLP in food research, medicine, medical products, and calibration of research equipment;
3. Upgrade the provision of technical services and food, drug, and medical product research as a national research laboratory;
4. Develop the quality of the center's research labs to provide technical support and transfer research techniques to network research labs.

Strategic plan

1. Develop capacity and modernity in researching food, medicine, medical products and calibration of research equipment;
2. Improve the quality and develop the capacity of the research laboratory according to international standards ISO/IEC 17025:2017, WHOPQ and GLP to promote domestic products as goods and export them abroad, including certifying imported goods to ensure safety for consumers;
3. Upgrade the technical services and testing of food, drugs, and medical products as a national research laboratory;
4. Develop the quality of the center's research labs to provide technical support and transfer research techniques to network research labs.
